

One-Step, Paper Backed Pads for Plastic (CR-39) and Mid Index Lenses

Paper backed pads offer an uneven surface for the abrasives to adhere. This causes them to stack making the pads more aggressive in nature than film backed pads.

Features & Benefits

P800-7CSF - P-grade, 800 grit, aluminum oxide, paper

- Works well on CR-39, mid and high index as well as polycarbonate and Trivex materials.
- Designed to break down at a decreased rate allowing the pad to fine in a rougher lens surface as well as the softer lens polymers.
- More aggressive than the 1200-P-3CSF pad.
- Available in 3" round (P800-7CSF) and 3" winged, high tack (EL2-800), 7 and 16 petal configurations.

1200-P-3CSF - P-grade, 1000 grit, aluminum oxide, paper

- Aggressively removes generator marks.
- Engineered with even particle distribution to provide consistent stock removal.
- Available in 3" round, 7-petal configuration.

J2000-7CSF - 2000 JIS grade, silicon carbide, paper

- Recommended for mid-index lenses and for reworks.
- Engineered with even particle distribution for a quality finish.
- Achieves excellent stock removal due to the aggressiveness of the silicon carbides.
- Available in 3" round, 7-petal configuration.

Specifications:

Cycle	Pad System	Time	Pressure	Speed
One-Step	P800-7CSF or EL2-800 1200-P-3CSF J2000-7CSF	1½ to 2min.	14 to 16 psi or .25 bar	High Speed is Recommended
Polish	449-7 Cream Polish Pad or 349-7 Yellow Polish Pad and PSI Lite 10 (3313G) or Brilliance (3335G)	6 min.	14 to 16 psi or .3 to .35 bar

PSI Polish Pads & Polish For Plastic & Mid Index Lenses

Yellow Ultimate (349 series)

- Designed for high index, polycarbonate and CR-39 materials.
- Allows for aggressive stock removal with abrasive resistant rayon fibers for longer polishing cycles.
- Part #: 349-7 – 3” round; 350-349-7 – 3.5” round; 325-349-7 – 3.25” round; EL2-349-7 – 3” winged, high tack.

Cream Ultra (449 series)

- Has a unique textile base that provides excellent strength and conforming properties.
- Engineered to maximize fiber retention during extended polishing cycles.
- Part #: 449-7 – 3” round; 350-449-7 – 3.5” round; EL2-449-7 – 3” winged, high tack.

PSI Lite 10

- High grade polish that works well on plastic, polycarbonate and high index lenses.
- Has an extended life with excellent suspension agents.
- Achieves a high surface quality rating and is recommended for lenses that are to be AR coated.
- Excellent sheeting action and exceptional product performance.
- Baumé: 20° - 24°; pH: 3.0 - 4.2; Particle Size (D50): 1.2 - 2.2µ
- Part #: 3313G – gallon; 3313P – 5 gallons

Brilliance

- Offers good performance on all plastic lens types.
- Flows easily, minimizing localized heat build up on lenses with increased polishing efficiency even on steep curves.
- Meets and exceeds many high Baumé products in performance with its unique mix of accelerants, antifoam and suspension agents.
- Noncorrosive, cleans easily, low carry off, no hard settling.
- Ideal for A/R and hard coats.
- Baumé: 18°; pH: 3.6; Particle Size: 1.7µ
- Part #: 3335G – gallon; 3335P – 5 gallons
