

# New Polish Feed Line

For LOH Cylinder Machines

## Features & Benefits

---

- Replaces the original copper or stainless steel polish feed spout on the LOH Cylinder Machine.
- The small diameter of the plastic loc line fitting increases the polish pressure for a more direct polish flow.
- Flexible loc line fittings can be adjusted to different positions giving the operator the ability to direct the flow to the areas where it is needed most.
- Easy to install.

## Specifications

---

Part #: 115M  
Tube: 12mm, stainless steel  
Fittings: 1/4" loc line
