Recycling & Filtration Systems 952A for Fining Water

PSI's 952A filtration and recycling system is a simple, yet highly effective, way to recycle fining water. This unit will pay for itself quickly by saving thousands of gallons of water daily. The 952A is easy to install and is simple to maintain. It comes with a cooling coil for hook up to an external chiller allowing for easy temperature control for a reduction in lens reworks and an increase in lens quality.

Features & Benefits

- Continuously removes abrasive solids and plastic particles from fining water allowing it to be recycled through cylinder machines.
- Pays for itself quickly by saving thousands of gallons of water daily.
- Simple to service requiring minimal maintenance and inexpensive to operate.
- The cooling coil, when connected to an external chiller, maintains constant fining water temperature all day reducing waves and aberrations caused by warm water temperatures.
- Aluminum and steel construction provides maximum durability.

Specifications:

Dimensions: 34"H x 18"W x 27"D
 Tank: Heavy duty, high impact plastic
 Tank Capacity: 15 gallons
 Serves: up to 4 spindles
 Pump: Little Giant Submersible
 Filter: 25 micron bag for plastic
 50 micron bag for polycarbonate
 Electrical: 115V, 3.2 Amp, Single Phase, 60Hz
 Shipping Wgt: 64 lbs.

System Includes: High impact polycarbonate tank, 1" wide iron dolly with ball bearing swivel casters, heat exchange coil, 1 bucket, 1 A-frame bag holder, 4 filter bags (specify if used for poly or plastic)

Accessories:

Description	Used For	Part #
25 Micron Filter Bag	Plastic	1160S
50 Micron Filter Bag	Polycarbonate	1174
Fining Water Additive		1110G
