Blocking Pads For Any Lens!

SecurEdge® PLUS For AR & Super Hydrophobic Lenses

- Dual adhesive system: one side offers a unique adhesive that will stick to AR and super hydrophobic coatings while the other side is designed to adhere to the block and remove easily
- Soft foam surface conforms to any curve while protecting the lens
- One-step system that doesn't require the use of a lens dot to adhere to the lens.
- Double tabbed for easy removal
- Available in a variety of shapes and sizes (see back for details)

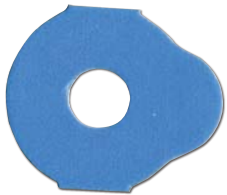

SecurEdge® For Hard Coated Lenses

- Unique reinforced foam that resists torque forces in the X-Y direction
- Soft foam surface conforms to lens curvature
- Modified acrylic adhesive system adheres to a wide range of hard coatings
- Double tabbed for easy removal
- Available in a variety of shapes and sizes (see back for details)

PSI BLUE For Uncoated Lenses

- Economically priced, production proven product
- Torque resistant
- Aggressive non-slip positive holding adhesive keeps pads in place
- Double tabbed for easy removal
- Available in a variety of shapes and sizes (see back for details)

Coating Type	Uncoated	Hard Coated	AR/ Super Hydrophobic
PSI Blue	Excellent	Good	Fair
SecurEdge®	Excellent	Excellent	Good
SecurEdge® Plus	Not Recommended*	Not Recommended*	Excellent

* SecurEdge Plus is not recommended for lenses that are not AR coated because it may be difficult to remove.
SecurEdge® is a registered trademark of St. Gobain Performance Plastics

Quantity:	1,000	1,000	1,000	1,000					1,000	

* Blocks are available for other edgers and in other configurations, contact PSI for more information.

** SecurEdge® Plus utilizes two different adhesives. Be sure the side of the blocking pad with "SecurEdge® Plus" printed on it is against the lens.

† Solid center pad option.

When using any blocking pad, for maximum adhesion, make sure all surfaces are clean prior to blocking. Match the block with the curvature of the lens for proper contact between to avoid slippage. Always consult your edger manufacturer for the correct setting for thin center and AR coated lenses.
