Horizon III Edger	Carbide	109	2

### ***PSI Quick Tips!***

#### **Edger Blade Maintenance**

- Clean your carbide edger blades to remove dust build up on a consistent basis to keep them free cutting.
- Monitor your blades often and replace when needed.
- Inventory backup blades for use when blades need changing or are out for retrue.
- PCD cutter blades can last six months or more. They are fragile so handle with care so not to chip the blade. Cleaning the PCD blade is not recommended. PCD blades can be retrued to help extend blade life. Call PSI Customer Service at 800-237-8154 for information on our Retrue Service.
