PSI LenSaver Tapes

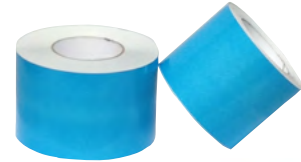

PSI Green LenSaver Tape

Provides high performance and outstanding visibility of lens markings especially on camera assisted blocking systems. It offers excellent adhesion but is easy to remove and deblock without residue. It is designed to be used with alloy or wax on all lens materials and curves without wrinkling.

PSI Blue LenSaver Tape

Protects the front surface of plastic, high index, polycarbonate and glass lenses during surfacing. PSI Blue conforms to all lens types without wrinkling. It offers a superior bond on coated and uncoated lenses and separates easily from alloy blocks. **Available in a double (72 yd.) roll for PSI ASTAs or standard 36 yard rolls.**

PSI Clear LenSaver Tape

Provides protection to front lens surface and lowers reject rates due to scratching. PSI Clear protects lenses from wax residue and eliminates messy wax clean up. Adheres without wrinkling.

LenSaver Performance Tape

Compatible with any lens taping system, LenSaver Performance Tape offers superior elasticity and excellent heat protection. Used with alloy blocking on glass and plastic lenses. **Available in large 108 yard rolls for satisloh tapers or standard 36 yard rolls.**
