Plastic Lens Polishes

Americal Plus

- For use on all plastic, high index, mid-index and polycarbonate surfaces.
- Tight particle size ensures consistently high cut rates while maintaining a brilliant surface.
- Superior suspension system, will not hard settle or cake on equipment.
- Ideal for AR and hard coatings.
- Long life and aggressive use in polycarbonate designated systems.
- Baumé: 25° - 30°; pH: 3.0 - 4.2; Particle Size (D50): 1.8 - 2.3 μ
- Part #: 3320G - gallon; 3320P - 5-gallon pail

Brilliance

- New chemistry has exceptional polycarbonate removal.
- High-grade surface quality characteristics.
- Flows easily, minimizing localized heat build up on high index lenses.
- Enhanced polishing efficiencies even on steep curves.
- Non-corrosive, cleans easily and has noticeably lower carry out.
- Suitable for AR and other hard coatings.
- Baumé: 18°; pH: 3.6; Particle Size (D50): 1.7 μ
- Part #: 3335G - gallon; 3335P - 5-gallon pail

High Pro

- High grade aluminum oxide based plastic polishing compound developed for high volume labs.
- High stock removal for short cycle times and a high surface quality rating of 8.5.
- Suspension treated.
- Recommended for plastic, polycarbonate and high index lens materials.
- Baumé: 25° - 33°; pH: 3.2 - 4.5; Particle Size (D50): 2.4 - 3.4 μ
- Part #: 3315 G - gallon; 3315P - 5-gallon pail

Plastic Lens Polishes

Pristine

- Premium grade aluminum oxide based plastic polishing compound.
- Developed for polycarbonate but works great on all lens materials.
- Imparts a high surface quality on all materials while offering a high Baumé.
- Exceptional suspension and sheeting action.
- Excellent for AR and backside coating applications.
- Long lasting polish.
- Baumé: 27°; pH: 3.3 - 3.5; Particle Size (D50): 1.9 μ
- Part #: 3330G - gallon; 3330P - 5-gallon pail

PSI Lite 10

- High grade polish that works well on plastic, polycarbonate and high index lenses.
- Has an extended life with excellent suspension agents.
- Achieves a high surface quality rating and is recommended for lenses that are to be AR coated.
- Excellent sheeting action and exceptional product performance.
- Baumé: 21-23°; pH: 3.0 - 4.2; Particle Size (D50): 2.4 - 3.4 μ
- Part #: 3313G - gallon; 331P - 5-gallon pail

Reliance

- Quality economical plastic lens polish designed for use on processing lines with a mix of materials.
- Good polish for AR coating applications.
- Utilizes excellent anti-foam and non-freezing formulation which maintains a consistent Baumé reading.
- Consistent stock removal on polycarbonate, plastic and mid and high index materials.
- Baumé: 18° - 22°; pH: 3.0 - 4.2; Particle Size (D50): 1.4 - 2.3 μ
- Part #: 3317G - gallon; 3317P - 5-gallon pail
